

A Life-Changing Career

Biomedical Ethics Research

Summer Undergraduate Program

Mayo Clinic seeks applicants for our 2023 summer undergraduate program in empirical bioethics research. Up to six students will be selected to participate.

Our Summer Undergraduate Program in Biomedical Ethics Research provides students with an unparalleled research experience to prepare them for careers in healthcare, science, law, or bioethics.

Each student is placed with a faculty mentor to contribute to a particular ethics research project, lasting approximately 10 weeks, beginning in late May or early June. In addition to conducting mentored research, students also receive a robust ethics education curriculum.

The application period will open the first week of January 2023, with a submission deadline of Jan. 16. Applicants should have the following prepared:

- Cover letter describing career goals and how biomedical ethics research relates to those goals
- Resume/CV
- 5-10 page writing sample, preferably on a topic in biomedical ethics
- Current, unofficial college transcript
- Two letters of recommendation from research mentors or undergraduate professors

QUALIFICATIONS

Successful applicants will be:

- Committed to pursuing a career related to biomedical ethics
- Able to work independently
- Proficient in written and verbal communication
- Highly motivated to learn new research methods
- Currently be enrolled in an undergraduate degree program
- Authorized to work and remain in the United States without necessity for Mayo Clinic sponsorship
- Able to pass a background check and post-offer placement assessment prior to their start date
