

SUBMISSION TYPES

All submissions for this edition are due

January 22, 2022

Submit here: <https://tinyurl.com/ybfznmeb>

1. LETTER

- From 100 to 1000 words.
- Written letter communicating on, or responding to (support or critique), a recently published science article.

2. QUESTION AND ANSWER

- At most 200 words and should directly answer the question.
- Response to the question prompt in the previous Columbia Scientist publication.
- You may also submit questions to be published and answered in a future publication.

3. OPINION EDITORIAL

- From 500 to 1500 words.
- A timely piece devoted to a specific topic with a strong perspective.
- Written to a general audience, avoiding scientific jargon and assuming no prior specialized knowledge.

4. BRIEFING

- From 1 to 2 pages (two pages will be consecutive, not front and back) with images and text.
- Visually pleasing, engaging in its attempt to convey information.
- Takes a complex science topic or advanced principle and communicates it in a way that could be understood by those with a high school-level understanding of science.

5. SCIENCE ART SHOWCASE

- Include a title and a 100-word description of the entry.
- Submissions may consist of a photograph, graphic design, comic, illustration, infographic, architecture, painting, sketch, sculpture, music, theater, film, fashion in any style
- Acceptable submission formats include PDF, JPG, MP3, .docx, .doc, YouTube link.

6. MINI LECTURE

- From 5 to 15 minutes long.
- Interactive video that may explain a topic to the audience, present novel research, communicate new theories, or introduce application exercises.

7. PODCAST

- From 5 to 30 minutes long.
- Name, title, 100-word description, and cover artwork/image required.
- High quality audio clip discussing novel science-based content.
